SUMMARY

Enthusiastic and detail-oriented junior tech professional with a passion for problem-solving and continuous learning. Seeking an entry-level role where I can contribute to innovative projects and grow as a developer in a collaborative team environment.

PROJECTS

LeetMetric App   **Live Demo**   **Github**

- Developed a tool to fetch and display LeetCode user statistics using the public API.
- Shows details like total problems solved, ranking, and contribution points in a structured format.
- Implemented a conic progress visualization to track solved Easy, Medium, and Hard problems.
- Focused on clean UI with HTML & CSS and dynamic rendering via JavaScript.

Notes Paste App   **Live Demo**   **Github**

- Created a paste management web app where users can add titles and save text snippets.
- Integrated Redux for state management and local storage for data persistence.
- Used React Router DOM to enable smooth navigation between pages.
- Implemented toast notifications with react-toaster and designed a modern UI with Tailwind CSS & Lucide React icons.
- Applied React hooks for dynamic rendering and component-level state handling.

Employee Management System   **Live Demo**   **Github**

- Developed an Employee Management System focusing on functionality using React and Tailwind CSS.
- Implemented LocalStorage as a data store to manage employees, admins, and task records.
- Utilized Context API for global state management and easy data sharing across components.
- Created an admin dashboard to log in, assign tasks, and track task status (new, active, completed, failed).
- Built an employee dashboard where employees can log in and view/manage their assigned tasks.
